

# 0.9.21.x.x Update Information

**Latest update 1/12/2018 – 11:30 AM PST** .. Updates and information are listed below...

## **KISS 0.9.21.0.x UPDATES**

**IMPORTANT:** Please note the new “packaging”. **KISS AIO** is one download. If you want the **Options**, they are another download. This reduces download size for those that just want standard without changes.

**NOTICE:** If updating from an older version, please **DELETE** all the old files first, then install new files. This is especially true in the World of Tanks/mods directory. You will get an error if there is a duplicate, or when you go into battle, you will not have an interface.

Take a look at **Bug Reports-Changes** in the top menu. I have posted information on how to make configuration changes in KISS, as well as a place for comments or bug reports in a central location.

Let me know if you find any other issues.

## **Latest Updates**

**1/12/2018** – Updated KISS AIO and KISS XVM to XVM 7.3.3

**1/11/2018** – Updated the following to 0.9.21.0.3

- **KISS AIO**, this only changed the directory version and may only be a change for NA server. If so for other servers, change the directory back to 0.9.21.0.2 after install. Also changed the way it is packaged. Removed No XVM and Options, now just the KISS Interface with XVM.

- **KISS XVM**, same as above
- **KISS Options**, added a download for those that used the options

### KISS Battle Interface Options

This download contain the options for KISS AI0. If you want to change from the standard interface to available options, you will need this download.

## **Options includes are:**

These all go into the **mods<game version>** folder

### **Crosshairs:**

- Grandpa's Version 2 (2 variations)
- KISS (5 variations)
- Harpoon

## Damage Panels

- Round (Zayaz) – 3 versions
- Square – 2 versions

## Icons

- All styles of Grandpa's icons
- Tech Tree icon options (6 options)
- Crew Icons numerous options

**12/20/2017** – Updated the following:

- **KISS AIO** to 0.9.21.0.2, XVM 7.3.2, PMOD 1.30.3
- **KISS XVM** to 0.9.21.0.2, XVM 7.3.2

**12/18/2017** – Updated KISS AIO to PMOD 1.30.2

**12/17/2017** – Updated following to XVM 7.3.1

- **KISS AIO**
- **KISS XVM**
- **WoW XVM**

**12/16/2017** – Updated the following to XVM 7.3.0

- **KISS AIO** – added statistics for the vehicle in the hangar. If you do not want stats, then rename the res\_mods/configs/xvm/grandpa/widgets.xc to \_widgets.xc and renam the no\_widgets.xc to widgets.xc. This will then show only the clock in the hangar and no stats.
- **KISS XVM** – added statistics for the vehicle in the hangar. If you do not want stats, then rename the res\_mods/configs/xvm/grandpa/widgets.xc to \_widgets.xc and renam the no\_widgets.xc to widgets.xc. This will then show only the clock in the hangar and no stats.
- **WoW XVM**

**12/15/2017** – Updated following for 0.9.21.0.1

- **KISS AIO** – mostly a directory name change, updated to XVM nightly 8516
- **Custom Icons**

**12/13/2017** – Updated following, **latest upload 13:00 PST**

- **KISS AIO** with PMOD 1.30.1 and XVM 8113 Dev, Custom Icons. As of 12:00 PST, everything seems to be working, let me know if issues.
- **Custom Icons**, was causing some issues. Corrected the .swf file

**12/12/2017** – Updated the following to 0.9.21.0

- **KISS AIO** – using **development version of XVM** until stable release
- **Custom Icons**
- **Contour Icons**
- **Crosshairs**
