

# Grandpa's Custom Skin Information

I have developed numerous 'skins' for the World of Tanks, they come in two flavors, Standard and Remodel.

## Standard

A 'skin' is nothing more than a repaint of a vehicle in World of Tanks. It is a 'client' skin, static, modification and therefore can only be seen in game by you, or other players using the same skin. All tanks of that identification will have the same skin in game, so all E-100 will look the same for example.

## Remodel

A 'model modification' remodels the structure of the tank, as well as applying a custom skin. This is how you get crew members in a vehicle. These require over-riding the default in game models and may not always work from update to update.

If you install a remodel and are having issue loading into game, delete it. The last update may have impacted the mod.

Remodels are listed on the [Modifications and Crew Page](#)

## Information

Always check the [Custom HD Skin Updates](#) page for the latest updates and screenshots.

[Installing and Changing Grandpa's Custom Skins](#) info is here..

All my skins are made to use in-game decals and in-game camo, to block in-game camo see details below. Each download usually contains multiple skins. To change between them you must rename the selected skin to the default skin name, see details below. Folder usually contains various camo options. See

included PDF for detailed installation and change instructions.

## **WARNING:**

These downloads include ALL the vehicles in a NATION and/or CLASS. Installing a package will over ride any custom skins you may have installed. Before installing read [Grandpa's Custom Skin Installation Guide](#) and if you already have custom skins you want to keep, install only those skins you want to add. Each package may have multiple skins for each vehicle, the guide explains how to change skins after installation.

## **Skin Packages**

A skin package will contain skins for all vehicles in that nation and/or nation/class. They may be of similar skin or camouflage design. The links will take you to the appropriate page for additional information/download. Click on the **NATION** to go to that page for screenshots and additional information.
