

Tiger 1A Remodel

Tiger IA Remodel

This is a remodel of the Tiger I. This will be the new model for 0.9.22, but I have made it for working in 0.9.21.0.3, with 3 different camos. All in one file.

Desert Camo

Brown Camo

3 Color Camo

Custom Skins and Remodel Updates

Latest update 1/15/2018, see finding aids and update information below.

Acknowledgement

Most of the remodels **are not entirely mine**, rather they are swaps of modules from other modders to form the specific combination or look. These come from parts and pieces of remodels by much more accomplished modders, including: **milkym4n, Avalon, foxerfit, Desyatnik_Pansy, TheFalconett, Historical Remodelling Project, goodman12, professor, Wollolo, deh0mbre, Yamayan, and HiBan.**

I compile them to get a working model without an script changes, then do a custom skin repaint to add camo and some detail to the model skin.

Information

For download go to the [Grandpa's Custom Skins](#) page or the [Modifications and Crew](#) page

Also check on the [Yandex Disk](#) and/or my thread on [NA forums](#)

Check out **Grandpa's You Tube** channel for quick looks at the mods

New MERDC Camo Patterns

I am using a new MERDC camo pattern for some of the custom skins. So far only a few

- T110E5
- T110E4
- T110E3
- M48A5

Downloads are on the Yandex under american_skins and the appropriate class

AT-15A Model Swap to Badger

AT-15A Model Swap to Badger

This is a model swap for the British Premium TD AT-15A to the Tier 10 Badger (0.9.21)

Remodel is by Grandpa, custom skin is by Ashtray

M4 Series “Loza” Remodels

M4 Series “Loza” Remodel

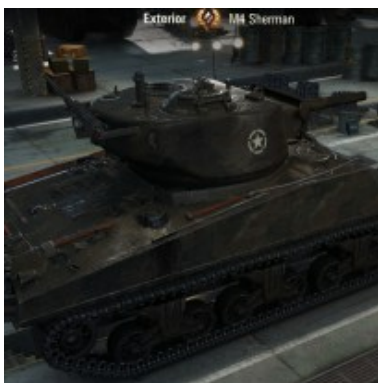

This download contains a model swap to the new (0.9.21) M4 A2 “Loza” Russian Lend Lease Premium for the M4 American Series.

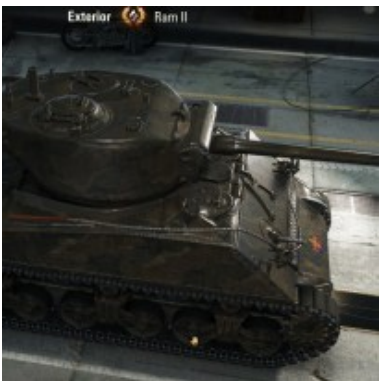

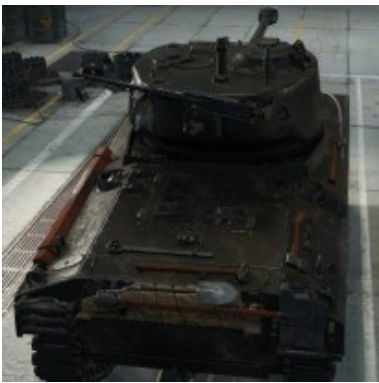

- M4 Sherman
- M4A3E8 Sherman EZ8
 - RAM II
- M4A3E2 Sherman Jumbo
 - M4A3E8A Fury

Exterior

M4 Sherman

You may use all if you so desire, but each tank looks very similar. The hull and turret of all are from the Loza, chassis are stock, guns are mix of stock and Loza

INSTALLATION:

- **Simple method:** Copy/Move the <vehicle name>.wotmod file from the archive (zip) to the World of Tanks/mods/x.x.x folder, where x.x.x is current game version
 - **Better method:** Create a folder in the World of Tanks/mods/x.x.x folder, where x.x.x is current game version, named **vehicles**. Then move the <vehicle name>.wotmod file from the archive (zip) into the that vehicles folder. This keeps things a little more organized.
