

# World of Warships

World of Warships has just recently been released and I have been playing it a lot. I am not going to do a lot of mods for it. Mostly, I use [Aslain's WoWS ModPack Installer w/Picture Preview](#) and recommend it highly.

## Custom ship skins

There are three custom skin downloads.

- Japan Ships
- USA Ships
- Other – German, Russian, and British Ships

These are a combination of skins from various authors from which I have mixed and matched to get what I wanted, and then added a few custom features of my own. They are from the following authors:

- Tanz
- HeavyCruiser\_Aoba
- Stig
- AwolFreedom
- Grandpa\* – marked mine with asterick – on my skins I enhanced the gray and reduced the amount of rust for a cleaner look.
